THE SOVEREIGN STONE

Wondrous Item, Legendary (Requires attunement by a Goliath)

The Sovereign Stone is an orc-head sized boulder made almost entirely of adamantine. Although it is usually held ceremoniously as a symbol of strength and leadership, certain Goliath heroes have been known to use the boulder as an improvised weapon.

If wielded as a weapon, the Stone has the heavy, two-handed, and adamantine properties. Attacks gain a +1 bonus to attack and damage rolls and deal 1d12 bludgeoning damage. Those who are attuned to the Stone gain access to the following abilities:

UNYIELDING

Even glancing attacks are powerful enough to cause damage. When you miss an attack against an opponent using a shield, you can reduce the shield's AC bonus by 1. If the AC bonus reaches 0, the shield breaks. If the opponent has no shield but is wearing medium or heavy armor, you reduce their AC by 1, to a minimum of 10 + their dexterity modifier.

FISSURE

You can direct your wrath at an object or the earth itself. By spending inspiration, You can forego an attack to move, weaken, or destroy a section of stone no larger than 5 feet in any direction. You can also target medium sized (or smaller) objects that aren't being worn or carried. Check out the improvising damage section for ideas.
